SUMMERY

As a passionate and detail-oriented web developer, I bring a solid foundation in frontend and backend technologies, with hands-on experience in creating responsive, user-friendly websites and web applications. My expertise in React , Node.js , express js allows me to build interactive and dynamic user experiences. I thrive in collaborative environments, consistently delivering clean, maintainable code while meeting project deadlines. With a problem solving mindset and a commitment to continuous learning, I stay updated with the latest web technologies to create solutions that not only meet client requirements but also enhance user satisfaction. I'm excited to contribute my skills to your team and help bring your digital ideas to life!

EDUCATION

BCA | CHOICE COLLEGE ART AND COMMERCE
PUNE UNIVERSITY 2021 – 2024

EXPERIENCE

WEB DEVELOPER INTERN | ATUM INFORMATION TECHNOLOGIES
22 MAY 2025 – 22 NOV 2025

Worked on building and maintaining web applications using React, Node.js, Express.js, and MongoDB. Collaborated with a small team to develop real-world features, fix bugs, and improve UI responsiveness. Improved understanding of teamwork, deployment, and API integration.

SKILLS

- Frontend – HMTL , CSS , JavaScript Tailwind CSS , MUI , Bootstrap , React,

- Backend – Node .js , Express. Js

- Database – MongoDB

- Tools – Postman , GitHub

STRENGTHS

1. **Problem-Solving Skil ls** – I enjoy breaking down complex problems and finding efficient solutions. This helps me in debugging code, optimizing performance, and delivering clean, functional applications.

2. **Attention to Detail** – I focus on writing clean, well-structured code and ensuring the design is pixel perfect, which enhances the user experience and overall quality of my projects.

3. **Responsive Design Skills** – Capability to build websites that work well on all devices.

4. **Attention to Detail** – Writing clean, maintainable code and ensuring pixel-perfect layouts.

PROJECTS

beRent

While building beRent, I learned how to connect the frontend and backend smoothly using React and Express.js. I implemented room listings, booking logic, and authentication using JWT. Working with MongoDB helped me understand database schema design and CRUD operations. This project improved my understanding of real-world client–server communication and REST APIs.

Human Resource Management System

In this project, I worked on modules like employee registration, attendance tracking, and leave management. Using React for the UI and Node.js with Express for the backend taught me how to structure a full-stack application efficiently. I also handled MongoDB collections to manage employee data and practiced role-based authentication and API integration.

Multi-Modal Transport Management System

Developing this system helped me understand complex data flow between multiple components. I used React to build dynamic dashboards and Express.js to create APIs for route and shipment data. MongoDB was used for managing transport details and tracking status. Through this project, I learned how to design scalable backend routes and improve frontend–backend communication.
